

PURIX

Solar Cooling - Designed for Green Living

Powered by the sun when available - but works around the clock.
Operates without sun by automatically switching to backup heat supply.

Gently cools without drying out the indoor environment
- or enjoy the heating from the solar collectors.

Low electricity consumption
< 150W.
Reduces energy costs for cooling and heating.

Flexible design for match with indoor environment
- various fan coil types,
- mono & multi split design.

Low noise level.

Applies water as natural refrigerant.
